Summary

Purpose of the Meeting:

This strategic work session is designed to align the GAS Tech Department’s training initiatives, team roles, and interdepartmental collaboration ahead of Q3 implementation. By integrating individual learning plans, finalizing offer letters, and showcasing forward-looking project ideas, the session ensures clarity, cohesion, and momentum across all technical functions.

Goals of the Meeting

Unify training roadmaps: to support both personal growth and teamwide capability

Finalize job offer letters and role definitions: for transparency and accountability

Strengthen collaboration with non-tech departments: by clarifying support roles and communication channels

Generate and prioritize future project ideas: aligned with business needs and data-driven insights

Assign project interest teams: and identify any skills or tools needed for execution
